

Manage your secure messages alongside your basic email messages seamlessly in MS Outlook.

Securely send, receive and track corporate messages on any device, anytime, anywhere.

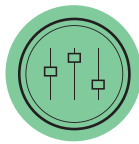

secure messaging outlook®

Encryption, Real-time Tracking, Enhanced Security Options in an integrated UI. Secure messaging integration with Microsoft Office enables users to send and receive encrypted email and large file attachments, with transparent real-time tracking and enhanced security options. The Secure messaging Microsoft Office app adds more than just security. Patented message controls and productivity features complement regular email through a beautiful user interface highlighted by the patented Delivery Slip.

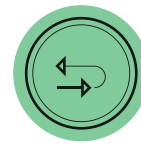

For Your Eyes Only (F.Y.E.O.)
Optional F.Y.E.O. password protection for maximum security and privacy.

Advanced message controls
Unique controls to lock content, prevent message replies, and forwards.

Real-time tracking
Track and prove when an email is received, read, replied or forwarded.

Complete Message Recall
Instant retraction of messages and attachments even after the message has been read.

Send and receive large files
Securely send, receive, track and control any-size file attachments directly within Office 365.

DLP
Policy-based DLP is deployable and is compatible with the native Office 365 DLP.

Archiving
Utilizing our Secure API delivery, secure messages can be automatically delivered, decrypted into any archiving solution. This allows all secure messages to be indexed for audit and eDiscovery purposes.

Single mail store
Decrypted messages can be stored in the email server, which creates a single mail store for eDiscovery purposes and user convenience.

Microsoft Outlook 2013 Integration

The screenshot displays the Microsoft Outlook 2013 interface with the Secure Messaging add-in. The ribbon includes tabs for FILE, HOME, SEND / RECEIVE, FOLDER, VIEW, SECURE MESSAGING, and ADD-INS. The SECURE MESSAGING tab is active, showing options like Reply, Forward, and More. The main pane shows an email from Susan Davis with a subject line 'RE: Revised Documents'. The email content includes a 'Secure Message' section with a ZIP file attachment 'Revised_Documents_24MB.zip.bt (4 KB)'. The right-hand pane shows the 'DELIVERY SLIP' and 'MESSAGE DETAILS' for the email, including the sender's name, email address, and a list of participants. The bottom of the pane shows 'Enhanced Security Options' with 'Reply Freeze™' and 'Forward Freeze™' status indicators.
