

DeliverySlip for Microsoft 365

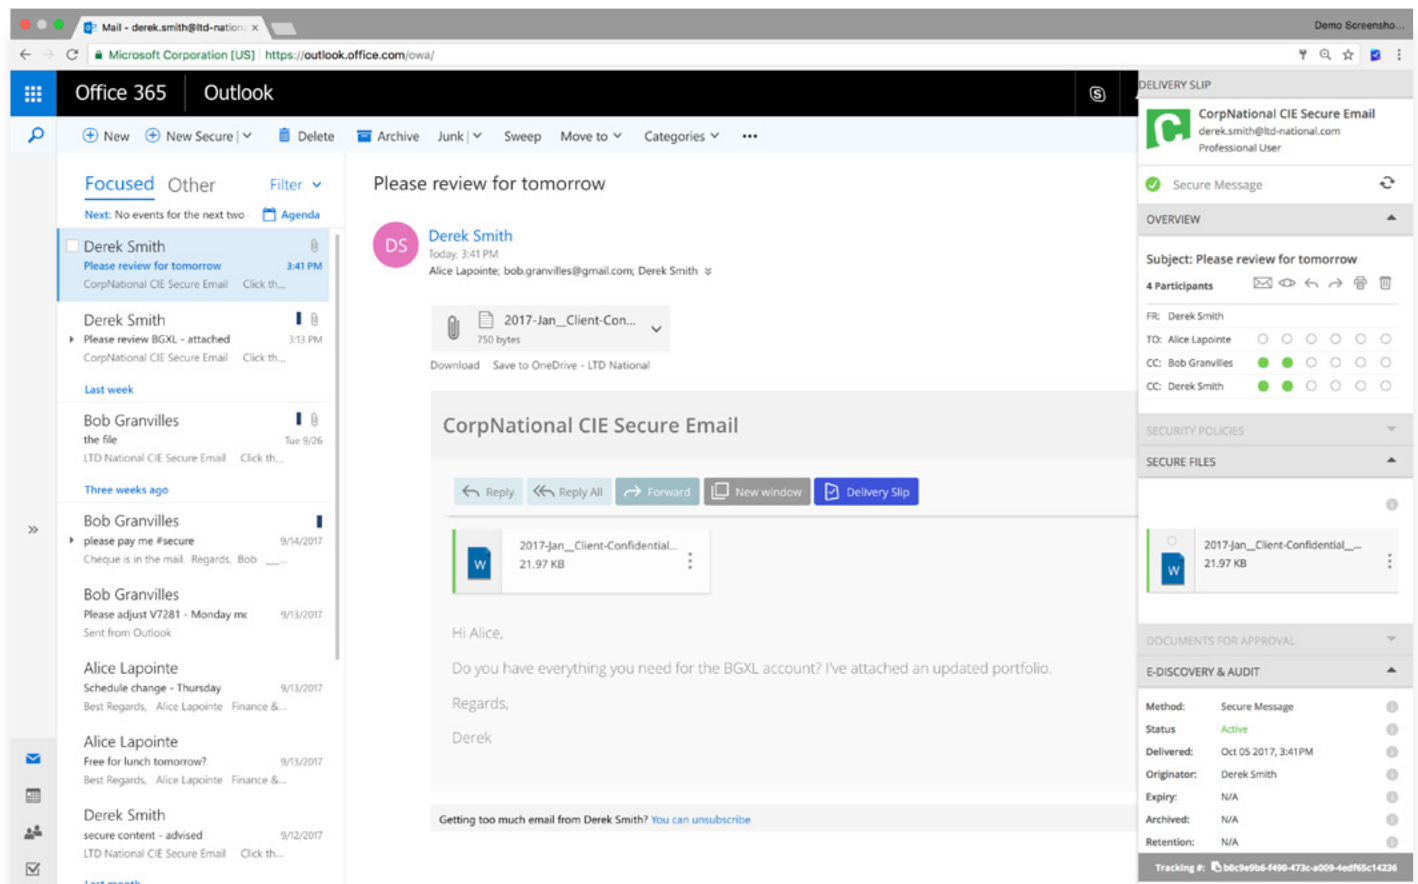

Transform Microsoft 365 into a powerful, secure communications platform with DeliverySlip Secure Messaging.

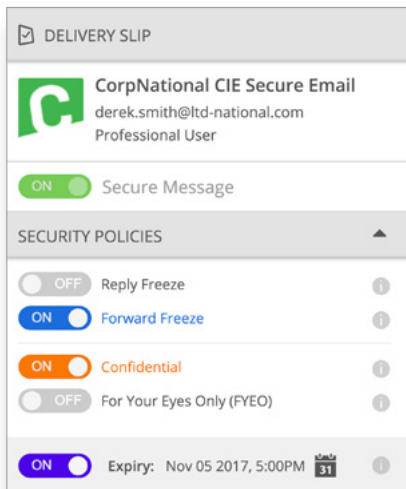

*Encrypt all communications and securely provision e-signatures, share large files,
and mount e-campaigns right in Microsoft 365 using existing accounts.*

How it works

DeliverySlip protects your business communications with complete message encryption, secure large file sharing, legally-binding e-signatures, and bulk send e-campaigns right in Microsoft 365 using existing email addresses. Plus, its advanced controls let you track, manage, and prove everything. Ideal for regulated organizations, DeliverySlip is the new way to do business.

The screenshot displays the Outlook interface for a secure email. The main content area shows an email from Derek Smith (DS) titled "Please review for tomorrow", sent today at 3:41 PM to Alice Lapointe and Bob Granvilles. The email body contains a confidential attachment "2017-Jan_Client-Confidential..." (21.97 KB) and the text: "Hi Alice, Do you have everything you need for the BGXL account? I've attached an updated portfolio. Regards, Derek". A "Delivery Slip" button is visible above the attachment. The right sidebar provides a "DELIVERY SLIP" overview, including the subject "Please review for tomorrow", 4 participants, and security policies. The "SECURITY POLICIES" section shows the message is a "Secure Message" with an "Active" status, delivered on Oct 05 2017 at 3:41 PM, with an originator of Derek Smith and no expiry, archival, or retention policies. A tracking ID is also provided at the bottom of the sidebar.

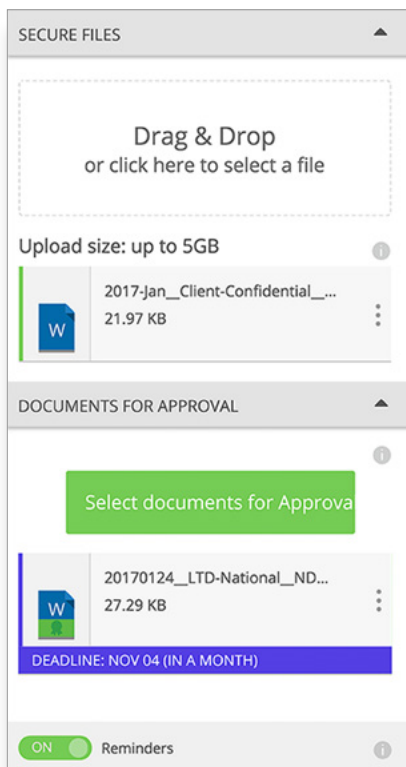

SECURE E-SIGNATURES

Request or provide legally valid secure e-signatures in seconds right in Microsoft 365 without any additional workflows or third-party applications.

SECURE LARGE FILE SHARING

Securely send, receive, track, and control file attachments up to 5 GBs directly within Microsoft 365 regardless of any attachment size restrictions in place.

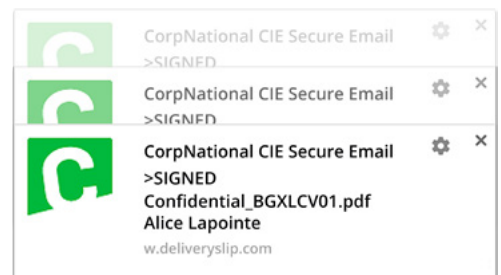

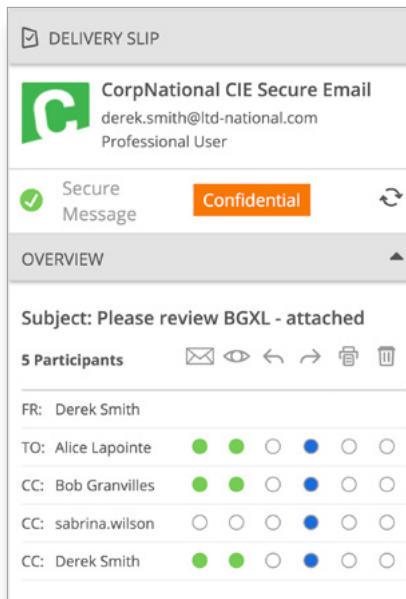

SECURE BULK SEND E-CAMPAIGNS

Securely communicate with unlimited recipients. Ideal for recalls, "click to acknowledge" campaigns or whenever sending sensitive data to a large group.

TOTAL MESSAGE RECALL

Totally retract messages and attachments even after the message has been read.

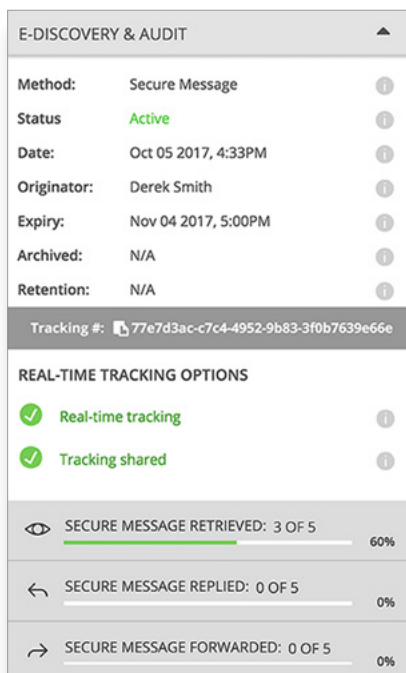

ADVANCE MESSAGE CONTROLS

Lock content, manage permissions, and add additional security with unique message controls.

REAL-TIME TRACKING

Track and prove when an email is received, read, replied, or forwarded. Ideal for e-discovery.

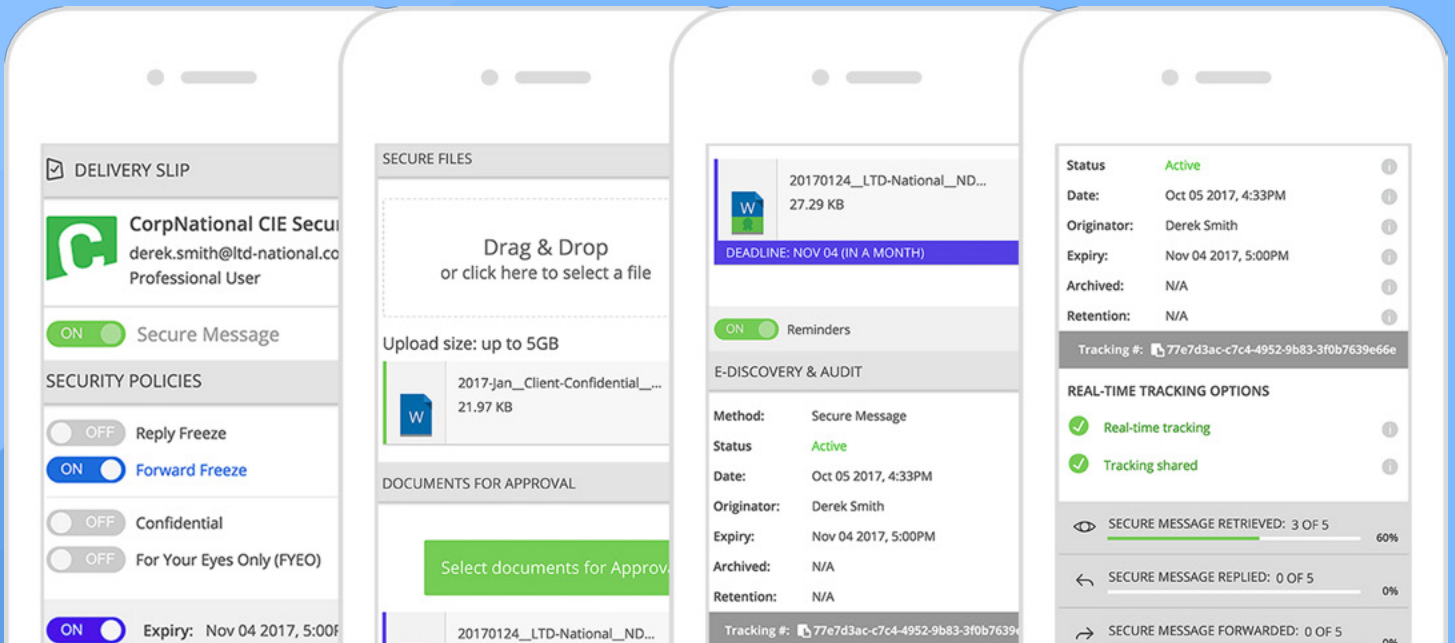

The Secure Messaging 365 add-in lets users to manage secure messages alongside their basic email messages seamlessly in 365. Integration and use is simple, ensuring rapid adoption without requiring any additional training. Because there are no cumbersome security keys, organizations can easily conduct business with all stakeholders in a secure, closed-loop environment that is easy to deploy, manage and scale. There is no better solution for securing your communications in Microsoft 365 than DeliverySlip.

DeliverySlip

Be productive. Be collaborative. Be secure.
