

DeliverySlip transforms Microsoft 365 and Outlook into a secure, cloud-based productivity and collaboration tool. Working seamlessly inside your email on any device. DeliverySlip enhances your email capabilities and gives you live updates and ultimate control over your messages—before and after you send them—using our patented DeliverySlip technology.

## What we offer

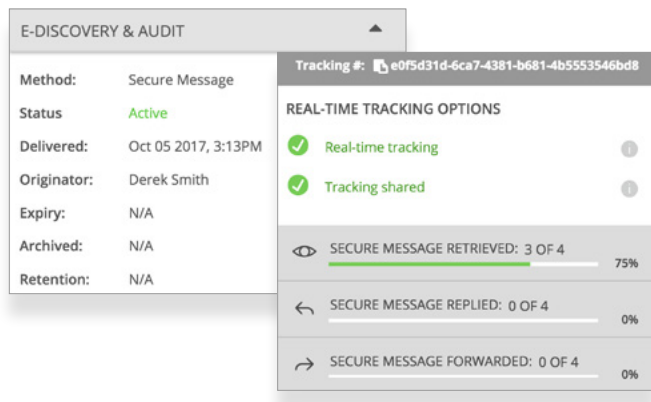

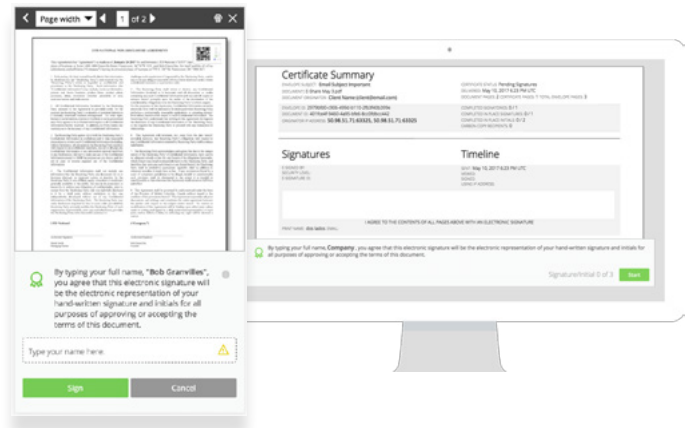

### Works within Microsoft 365 and Outlook

DeliverySlip helps reduce the learning curve on sending and receiving secure communication internally, and externally. Users stay within their favorite email tool which increases usage that supports company and individual security.

## E-Approval & E-Signature, Large File

Increase turnaround time on signature required documents, obtain faster approvals on day to day requests, and share large files without overloading inboxes – anywhere, on any device.

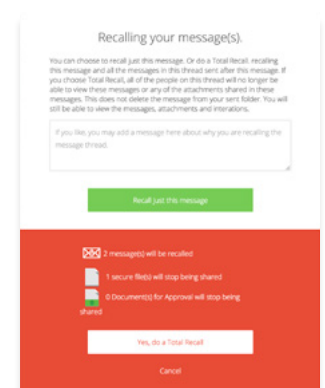

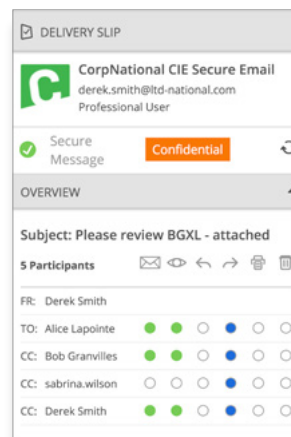

## Regulatory Compliance, Audit

Ensure compliance with jurisdiction-specific data privacy and protection rules while securing sensitive company and customer data. DeliverySlip applies bank-grade security, and makes it simple to communicate private information, securely.

## Enhances Microsoft 365 Security

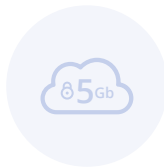

DeliverySlip adds live updates, along with email tracking and controls, and true message recall.

See who has opened, replied, forwarded, and deleted an email. Receive live updates when an action has taken place.

## Key Use Cases

---

### **SECURE EMAIL & LARGE FILE SHARING**

Healthcare providers, lawyers, accountants and government workers require a solution to securely exchange private information with patients and clients such as test results and financial information. DeliverySlip provides a turnkey solution that works right inside their inbox.

### **E-SIGNATURE & E-APPROVALS**

Did you know that using e-signature instead of paper can reduce signature turnaround time by 80%? DeliverySlip offers a solution that not only provides non-repudiation, but improves work ow for both legal documents and contracts as well as day to day approvals such as expense reports and PTO requests.\*Source: EMA: Document Security and Electronic Signatures.

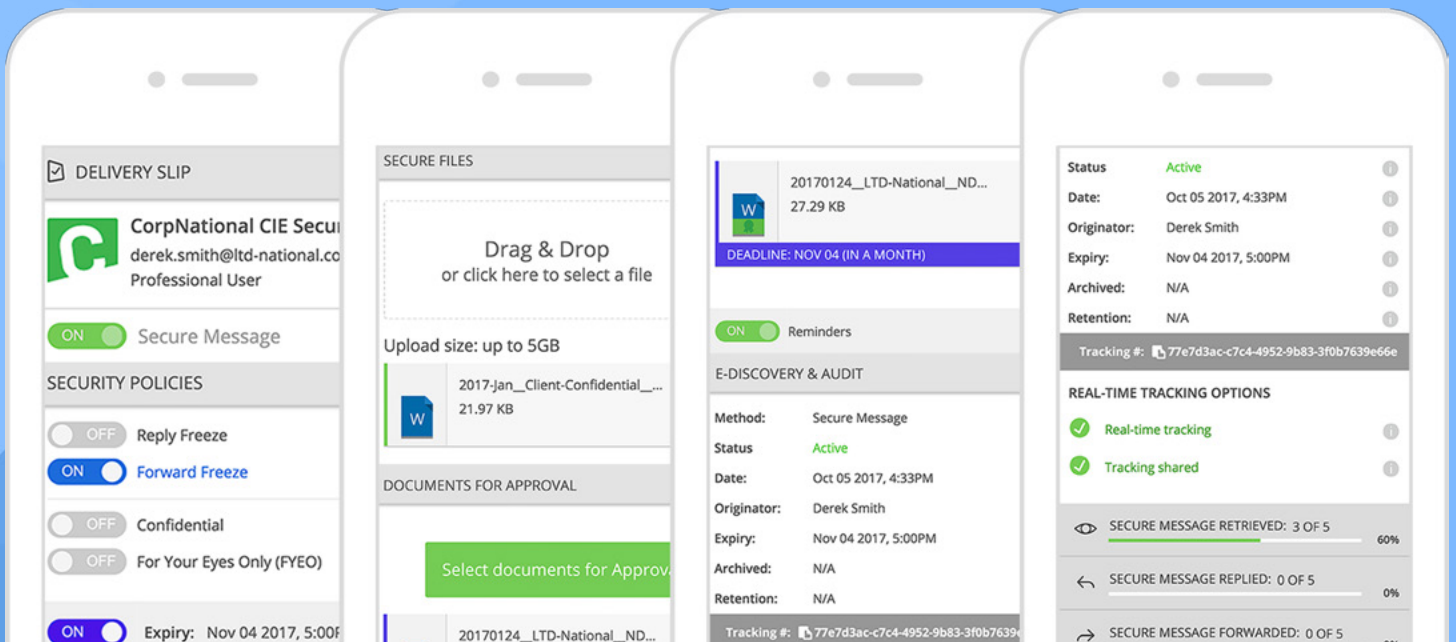

### **E-DISCOVERY & AUDIT**

DeliverySlip assigns a unique identifier for tracking, audit, and e-Discovery purposes. This information is displayed within the Delivery Slip, showing who has accessed, downloaded, shared, or printed attachments – complete with timestamps and IP addresses.

# DeliverySlip

Be productive. Be collaborative. Be secure.
