E-Everywhere

DeliverySlip works where you work: anywhere, anytime, on any device

Securely send, receive, track, and control your email communications.
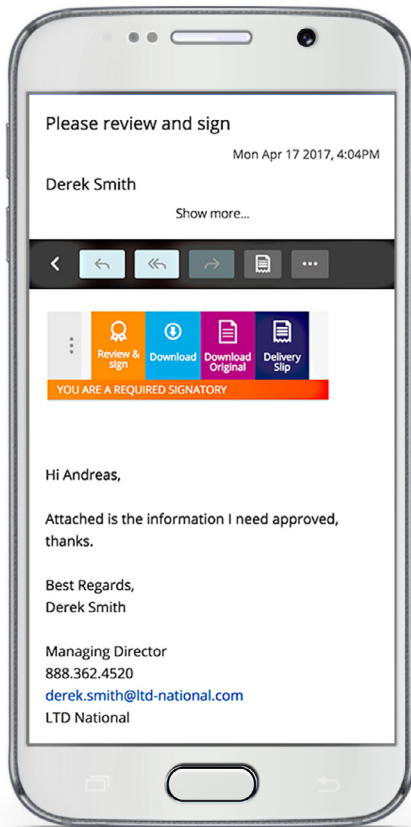

iOS   android   Windows Phone

SECURE MESSAGING, LIVE UPDATES & POWERFUL CONTROL ON EVERY DEVICE

DeliverySlip enables secure, simplified, and powerful online collaboration and communication, anytime, anywhere, on any device. Take advantage of DeliverySlip's unparalleled mobile experience, including our convenient biometric thumbprint authentication on your iPhone. Transition seamlessly from mobile to desktop; check email, provide e-signatures, or send large files up to 5 GB from within iOS, Android, or Windows Phone. Plus, Single Sign-On (SSO) boosts security, simplifies authentication and improves the user experience by eliminating the need to remember yet another password. Ideal for "bring your own device" (BYOD) policies, DeliverySlip is managed centrally by administrators and quickly deployable via mobile device management (MDM) systems.

Take control of your email communications. Decide whether secure messages can be replied to or forwarded; get notified the moment a secure message is received and read by recipients; and revoke messages sent in error—even after they are opened.

SINGLE SIGN-ON (SSO)

Boost security and provide a seamless, expedited user experience with a single user authentication environment.

SECURED IN THE CLOUD

Sensitive data is stored in the secure cloud, not on the mobile device, ensuring content is protected even if a device is lost or stolen.

LIVE UPDATES

Get updates the moment a secure message is received, read, replied to or forwarded by recipients.

COMPLETE MESSAGE RECALL

Fully revoke messages and attachments sent in error even after the message is read.

SECURE FILE SHARING

Securely share multiple file attachments over email without overloading inboxes.

NATIVE APPS FOR ALL DEVICES

Supports licensed users and guests exchanging secure messages on iOS, Android and Windows Phone platforms.

CENTRALIZED ADMINISTRATION

Deployable via mobile device management (MDM) systems, access can be quickly enabled or disabled in the event of a lost or stolen device.

DATA LEAK PREVENTION (DLP)

Policy-based DLP applies to messages sent from mobile devices.

About DeliverySlip

Powered by 10 patents and stress tests by KPMG, you can trust DeliverySlip to keep your communications safe. DeliverySlip is the leader in email encryption and file security. Used and trusted in virtually every industry with over 5 million users and growing every day.
