

DeliverySlip for iOS

DeliverySlip native apps on every mobile platform

Securely send, receive, track, and control email communications on any device. Encryption, real-time activity notifications, and powerful control extended to every device. DeliverySlip's native Secure Email Apps for iOS, Android, BlackBerry, and Windows Phone deliver much more than email encryption on smart phones and tablets.

iOS

android

 Windows Phone

With DeliverySlip, users know the moment a secure message is received and read by the recipients. They can control whether secure messages can be replied to or forwarded, revoke messages sent in error even after they are opened and securely share file attachments over email. DeliverySlip is ideal for "bring your own device" (BYOD) policy compliance because it is managed centrally by administrators and deployable via mobile device management (MDM) systems.

Features & benefits

NATIVE APPS FOR ALL DEVICES

Supports licensed users and guests exchanging secure messages on iOS, Android, BlackBerry, and Windows Phone platforms.

CENTRALIZED ADMINISTRATION

Deployable via mobile device management (MDM) systems, access can be quickly enabled or disabled in the event of a lost or stolen device.

SECURED IN THE CLOUD

Sensitive data is stored in the secure cloud, not on the mobile device, ensuring content is protected even if a device is lost or stolen.

POWERFUL MESSAGE CONTROLS

Users can prevent recipients from replying to or forwarding secure message as well as add an additional password on extra-sensitive content.

REAL-TIME ACTIVITY NOTIFICATIONS

Users can see the moment a secure message is received, read, replied to, or forwarded by recipients.

COMPLETE MESSAGE RECALL

Fully revoke messages and attachments sent in error even after the message is read.

SECURE FILE SHARING

Securely share multiple file attachments over email without overloading inboxes.

DATA LEAK PREVENTION (DLP)

Policy-based DLP applies to messages sent from mobile devices.

About DeliverySlip

Powered by 10 patents and stress tests by KPMG, you can trust DeliverySlip to keep your communications safe. DeliverySlip is the leader in email encryption and file security. Used and trusted in virtually every industry with over 5 million users and growing every day.
